***Election/R strictions***

1. Applicant's election without traverse of Group I (claims 1-49) in Paper No. 6 is acknowledged. However, Group I contains claims directed to the following patentably distinct species of the claimed invention:

**Species I** - an electrically operated memory element having a dielectric layer formed between a pore and a substrate and at least a portion of the dielectric underlying at least a portion of the pore, as recited in claims 1-8.

**Species II** – an electrically operated memory element comprising a dielectric layer having a pore therein , as recited in claims 9-34.

**Species III** – an electrically operated memory element comprising a conductive layer disposed on a sidewall surface of a dielectric layer, wherein an edge portion of the conductive layer is exposed on the sidewall surface, as recited in claims 35-43.

**Species IV** – an electrically operated memory element comprising an electrode which has a first conductive layer adjacent to a memory material and a second conductive layer remote to the memory material, wherein the second conductive layer is edgewise adjacent to the first conductive layer, as recited in claims 44-49.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phat X. Cao whose telephone number is (703) 308-4917. The examiner can normally be reached on Monday - Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wael Fahmy can be reached on (703) 308-4918.
